1. Purpose of this Document

Architecture Building Blocks (ABBs) relate to the Architecture Continuum (see Architecture Continuum), and are defined or selected as a result of the application of the Architecture Development Method (ADM).

Characteristics are:

- Capture architecture requirements; e.g., Business, Data, Application, and Technology requirements
- Direct and guide the development of SBBs

1.1 Building Blocks Process

Tailoring note: as this template states, building blocks are defined mainly in Phases A to D. The Architecture Building Blocks were derived from the Phase B–D gap analyses and are filed with Phase E, where they are grouped into work packages. Phases F and G are outside this engagement (Preliminary Phase to Phase E).

Gaps from Phases B–D were grouped into nine required capabilities (ABBs). ABBs state what is needed without naming products; Solution Building Blocks (E3) state how each will be delivered.

2. Building Blocks

Nine ABBs were identified for the Barangay San Antonio Health Department.

2.1 Fundamental Functionality

ABB	Name	Fundamental functionality
ABB-1	Medicine inventory management	Record receipts, issues and balances daily; flag items below reorder level
ABB-2	Official collaboration workspace	Organization-owned storage, file sharing and messaging separate from personal accounts
ABB-3	End-user computing for frontline staff	Shared devices and basic skills for data entry
ABB-4	Patient record management	One active index per patient tied to the EMR record number; retention and disposal
ABB-5	Single-capture program reporting	Capture each service tally once; generate reports from it
ABB-6	Patient flow management	Issue queue numbers and display order of service
ABB-7	Resilient connectivity	Keep cloud systems reachable during outages
ABB-8	Prescription interoperability	Share one prescription entry across EMR, dental eMED and PhilHealth
ABB-9	Community outreach and promotion	Reach condo residents and field families; capture field data directly

2.2 Attributes

ABB	Owner	Priority (from requirements)
ABB-1 Medicine inventory management	Nurse; Committee on Health	High (R-02, R-03)
ABB-2 Official collaboration workspace	Barangay IT	Medium (R-05)
ABB-3 End-user computing for frontline staff	Aides, BHWs	High (R-04, R-11)
ABB-4 Patient record management	Custodian; midwife	Required (R-09, R-10)
ABB-5 Single-capture program reporting	Midwife; nurse	Medium (R-07)
ABB-6 Patient flow management	Doctor; front desk	Medium (R-06)
ABB-7 Resilient connectivity	Barangay IT	Medium (R-08)
ABB-8 Prescription interoperability	CHD; vendor; PhilHealth	High (R-01)
ABB-9 Community outreach and promotion	Kagawad; nutrition; dental	Medium (R-12)

2.3 Semantic

All blocks use the entities of the Data Architecture (Patient, Consultation Encounter, Prescription, Medicine Stock Transaction, Monthly Program Report) and the EMR record number as the common patient key.

2.4 Security Capability

- Official accounts with individual logins; no work files on personal accounts (ABB-2).
- Restricted folders for mental health and other sensitive data.
- Records cabinet with key log (ABB-4); Data Privacy Act consent preserved.

2.5 Manageability

- Barangay IT team supports barangay-owned devices and accounts.
- Custodian (Ms. Josefina G. Roa) keeps the device inventory.
- Nurse Hardman owns the stock sheet; Ms. Abong owns the reporting template.

3. Interfaces

Interfaces between building blocks are summarized below.

3.1 Overview

Block	Interfaces with
ABB-1 Inventory	LMIS receipts; utilization log; monthly DOH inventory report
ABB-2 Workspace	All program reports; CHD coordinators' shared folders
ABB-4 Records	City EMR record number
ABB-5 Reporting	ABB-2 storage; ABB-3 devices; CHD report formats
ABB-6 Queue	Front desk registration; ABB-7 connectivity
ABB-8 Interoperability	City EMR, dental eMED, PhilHealth YAKAP

3.2 Interoperability

Only ABB-8 changes interfaces between City and national systems, and it is requested from the City, not built by this project. Other blocks exchange data through spreadsheets and the EMR record number.

3.3 Dependent Building Blocks

- ABB-5 depends on ABB-2 and ABB-3.
- ABB-6 depends on ABB-7.
- ABB-1 (buffer) depends on the barangay budget.

4. Mapping

Mapping of ABBs to organizational entities and policies.

4.1 Mapping to Business/Organizational Entities

ABB	Capability (Phase B)	Organization
ABB-1 Medicine inventory management	Medicine and supply logistics	Nurse; Committee on Health
ABB-2 Official collaboration workspace	IT and equipment; Reporting	Barangay IT
ABB-3 End-user computing for frontline staff	Staffing and training; IT	Aides, BHWs
ABB-4 Patient record management	Records management	Custodian; midwife
ABB-5 Single-capture program reporting	Reporting and compliance	Midwife; nurse
ABB-6 Patient flow management	Patient care	Doctor; front desk
ABB-7 Resilient connectivity	IT and equipment	Barangay IT
ABB-8 Prescription interoperability	Records; Patient care	CHD; vendor; PhilHealth
ABB-9 Community outreach and promotion	Community outreach	Kagawad; nutrition; dental

1.1 Mapping to Business/Organizational Policies

- One Patient, One Record → ABB-4, ABB-8.
- Use the City Record, Don't Rebuild It → ABB-8 (request, not rebuild); no parallel patient system.
- Report Once, Count Many Times → ABB-5, ABB-1.
- Data Privacy Act and DOH retention → ABB-2, ABB-4.

A Abbreviations

Abbreviations, acronyms and reference codes used in this document and its figures, in alphabetical order.

Abbreviation	Meaning
ABB	Architecture Building Block (ABB-1 to ABB-9 are reference numbers)
ADM	Architecture Development Method, the step-by-step method of the TOGAF Standard
BHW	Barangay Health Worker
CHD	City Health Department (Pasig City)
DOH	Department of Health
eMed / eMED	Name of the City's electronic medical record system; “dental eMED” is its separate dental system
EMR	Electronic Medical Record
Hon.	Honorable (title of elected officials)
IT	Information technology
LMIS	Logistics Management Information System
PhilHealth	Philippine Health Insurance Corporation
R-01 …	Stakeholder requirement reference number
SBB	Solution Building Block (SBB-1 to SBB-9 are reference numbers)
TOGAF	The Open Group Architecture Framework (the TOGAF® Standard)
UA&P	University of Asia and the Pacific
YAKAP	PhilHealth Yaman ng Kalusugan Program (primary-care benefit)
