1. Purpose of this Document

Solution Building Blocks (SBBs) relate to the Solutions Continuum, and may be either procured or developed.

SBB characteristics are:

- Define what products and components will implement the functionality
- Define the implementation
- Fulfill business requirements
- Be product or vendor-aware

1.1 Building Blocks Process

Tailoring note: as this template states, building blocks are defined mainly in Phases A to D. The Solution Building Blocks were derived from the Phase B–D gap analyses and are filed with Phase E, where they are grouped into work packages. Phases F and G are outside this engagement (Preliminary Phase to Phase E).

For each ABB (E2), the team selected the simplest, lowest-cost solution the barangay or health center can control, or a formal request to the City where the solution is City-owned.

2. Building Blocks

Nine SBBs realize the nine ABBs.

2.1 Specific Functionality

SBB	Solution	Realizes	Work package
SBB-1	Shared stock sheet with reorder formulas + barangay buffer budget line	ABB-1	WP1
SBB-2	Barangay Google account / Workspace shared drive + work-only chat groups	ABB-2	WP2
SBB-3	2–3 desktops at the front desk + UA&P computer workshops	ABB-3	WP3
SBB-4	Active-chart index sheet, archive boxes, lockable cabinet, disposal log	ABB-4	WP4
SBB-5	Shared daily tally sheet with monthly report template	ABB-5	WP5
SBB-6	Queue ticket and display (UA&P capstone pilot)	ABB-6	WP6
SBB-7	Second provider or LTE router with failover + outage procedure	ABB-7	WP7
SBB-8	City / vendor integration of EMR, dental eMED and YAKAP (requested)	ABB-8	WP8
SBB-9	Wellness Pop-up partnerships, oral health campaigns, BNS field laptop and weighing kit	ABB-9	WP9

2.2 Attributes

SBB	Owner	Indicative cost
SBB-1	Nurse Hardman; Kagawad Rustia	Tracker ₱0; buffer about ₱150,000–200,000 a year (2026 spend: about ₱150,000)
SBB-2	Barangay IT; Kagawad Rustia	₱0 (shared barangay account) to about ₱4,000–5,000 a month (paid workspace, about 10 users)
SBB-3	Kapitan Lising; UA&P team	About ₱50,000–105,000 for 2–3 desktops; training ₱0
SBB-4	Ms. Roa (custodian); Ms. Abong	Cabinet about ₱10,000–20,000; staff time
SBB-5	Ms. Abong; Nurse Hardman	₱0 (templates)
SBB-6	Dr. Bonilla; UA&P IT program	Development ₱0 (capstone); ticket printer and display about ₱15,000–30,000
SBB-7	Barangay IT	About ₱1,500–2,500 a month plus router
SBB-8	Dr. Bonilla; Kapitan Lising	₱0 to the barangay
SBB-9	Kagawad Rustia; Dr. Magpali; Mr. Vasquez	Field laptop about ₱30,000; weighing kit to be quoted

Costs are indicative estimates from typical 2026 Philippine retail prices, not quotations; they must be verified through barangay procurement.

2.3 Performance

- Stock sheet updated the same day as dispensing.
- Tally sheet entry by aides and BHWs at the end of each field or clinic session.
- Backup connection switches over without staff action.

- Old-patient record found in under a minute through the active-chart index.

2.4 Configurability

- Reorder levels adjustable per medicine (SBB-1).
- Tally sheet columns follow each CHD program report (SBB-5).
- Queue rules (priority lanes for seniors and pregnant women) set by Dr. Bonilla (SBB-6).

2.5 Drivers and Constraints

- Drivers: medicine shortage, paperwork load, personal-account risk, outages, condo resistance.
- Constraints: City-owned systems cannot be modified; City approval for process and system changes; barangay budget cycle; no new staff assumed; Data Privacy Act.

3. Interfaces

Each SBB uses the interfaces of its ABB (E2, Section 3).

3.1 Overview

SBB	Interfaces
SBB-1	Utilization log; LMIS receipts; Treasurer voucher (buffer)
SBB-2	All staff; CHD shared folders
SBB-3	SBB-2; SBB-5
SBB-4	EMR record number; disposal logbook
SBB-5	SBB-2; CHD report formats
SBB-6	Front desk; SBB-7
SBB-7	PLDT line; LTE provider
SBB-8	City EMR vendor; PhilHealth
SBB-9	Condo administrators; e-OPT tool

3.2 Interoperability

SBB-8 is the only cross-system integration and depends on the City and PhilHealth; all other SBBs are self-contained and exchange data via spreadsheets and the EMR record number.

3.3 Dependent Building Blocks

- SBB-5 depends on SBB-2 and SBB-3.
- SBB-6 depends on SBB-7.
- SBB-1 buffer line depends on the 2027 barangay budget.

3.4 Required Solution Building Blocks

SBB-2 (workspace) and SBB-3 (computers) are prerequisites for SBB-5; SBB-7 is a prerequisite for SBB-6.

4. Mapping

Mapping of SBBs to IT topology and to ABBs.

4.1 SBB Mapping

SBB	Location / topology	Operational policy
SBB-1	Shared computer at the nurse station; barangay-owned drive	Updated the same day; reconciled monthly
SBB-2	Barangay-owned cloud account	No work files on personal accounts
SBB-3	Front desk	Used by aides and BHWs in pairs (buddy system)
SBB-4	Records room	7-year retention; key log
SBB-5	Shared computer + workspace	Same-day tally entry
SBB-6	Front desk display	CHO-approved queue rules
SBB-7	Health center network	Failover during clinic hours
SBB-8	City EMR (vendor cloud)	City-owned change
SBB-9	Field sites; BNS laptop	Outreach calendar outside month-end

4.2 Relationships Between SBBs and ABBs

Each SBB-n realizes ABB-n (one-to-one). SBB-1 combines a tool (stock sheet) and a policy (barangay buffer budget line) to realize ABB-1.

A Abbreviations

Abbreviations, acronyms and reference codes used in this document and its figures, in alphabetical order.

Abbreviation	Meaning
ABB	Architecture Building Block (ABB-1 to ABB-9 are reference numbers)
BHW	Barangay Health Worker
BNS	Barangay Nutrition Scholar
CHD	City Health Department (Pasig City)
CHO	City Health Officer
e-OPT	Electronic Operation Timbang Plus tool of the National Nutrition Council
eMed / eMED	Name of the City's electronic medical record system; “dental eMED” is its separate dental system
EMR	Electronic Medical Record
Hon.	Honorable (title of elected officials)
IT	Information technology
LMIS	Logistics Management Information System
LTE	Long-Term Evolution (4G mobile internet)
OPT / OPT Plus	Operation Timbang Plus: yearly weighing and measuring of children aged 0–59 months
PhilHealth	Philippine Health Insurance Corporation
PLDT	PLDT Inc., an internet and telephone provider
SBB	Solution Building Block (SBB-1 to SBB-9 are reference numbers)
TOGAF	The Open Group Architecture Framework (the TOGAF® Standard)
UA&P	University of Asia and the Pacific
WP1 … WP9	Work package (a group of related changes delivered together)
YAKAP	PhilHealth Yaman ng Kalusugan Program (primary-care benefit)
