DR. JOSEPH R. PANALIGAN, MD, MHA
City Health Officer
City Health Department
Pasig City

Subject: Request for Permission to Conduct Interviews at the Barangay San Antonio Health Center

Dear Dr. Panaligan:

Greetings of peace!

I am Rome Victor Mag-iba Sendin, group leader of a student team composed of Wilson Halim, Kevin Enrico Ang, Samuel Anthonius Badillo, and myself. We are students of the University of Asia and the Pacific taking **Solution Architecture**, an Information Technology elective. As our final course requirement, we are studying the operations of the **Barangay San Antonio Health Center** using TOGAF (The Open Group Architecture Framework), an international method for understanding how an organization works and planning improvements step by step.

Our goal is to prepare a **free, practical improvement roadmap** for the health center. To do this, we hope to understand how the center's operations work together, including patient care, medicine supply, records and reporting, community outreach, staffing and training, budgeting, and equipment. The final output will identify current challenges and recommend realistic, prioritized improvements. We are not selling or installing any system.

In line with this, we respectfully request your **permission to conduct short interviews** with the personnel of the Barangay San Antonio Health Center from **October 15 to 21, 2026**, under the following conditions:

- Each interview will take about **25 minutes** and will be scheduled around the staff's duties so that patient care is not disrupted.
- Staff may choose to answer **in person, through an online call, or in writing**. Participation is voluntary.
- Interviews will be voice-recorded **only with the participant's consent**, and the recordings will be used solely for our academic notes.
- We will **not collect any patient names, medical records, or personal health information**, in compliance with the Data Privacy Act of 2012 (RA 10173).
- Questions focus on work processes, tools, and general figures (for example, number of patients per week), not on individual patients.

This project is also in line with the existing partnership between the two institutions. Attached in this email is the **Memorandum of Understanding** between the University of Asia and the Pacific Foundation, Inc. and Barangay San Antonio for UA&P's Extension Program, signed by Barangay Captain Thomas Raymond U. Lising.

UNIVERSITY OF
ASIA AND THE PACIFIC

Upon completion, we will gladly share a copy of our findings and recommendations with the City Health Department and the Barangay San Antonio Health Center. Our project is due on **October 23, 2026**.

Attached are our interview letters and question sheets for your reference. For any concerns, you may reach me at **romevictor.sendin@uap.asia** or **0945 631 5746**.

We sincerely hope for your favorable approval. Thank you very much for your time and support.

Respectfully yours,

_____
